Nishchay Manhas

East Delhi, India | +91 8219218028 | nishchaymanhas@gmail.com
LinkedIn | GitHub | TryHackMe | Medium

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in threat intelligence, vulnerability research, penetration testing, and security assessment through professional experience, projects, home labs, and CTFs. CompTIA Security+ and eJPT certified, with practical knowledge of Splunk, Wazuh, Burp Suite, Wireshark, Nmap, Metasploit, Kali Linux, and Python. Interested in Threat Intelligence, Vulnerability Research, and Security Operations roles.

PROFESSIONAL EXPERIENCE

Safe Security **Jul 2026 – Present**
Threat Intelligence Intern *India*

- Supporting threat intelligence and cybersecurity research activities.
- Conducting security research and technical analysis of publicly disclosed vulnerabilities.
- Preparing technical documentation and research findings.

i-Diary IT Solutions Pvt. Ltd. **Dec 2024 – Jan 2025**
Penetration Testing Intern *Agra, India*

- Performed web application penetration testing and vulnerability assessment.
- Conducted reconnaissance, service enumeration, and security testing using Burp Suite, Nmap, Metasploit, and OWASP ZAP.
- Identified authentication weaknesses, injection flaws, and security misconfigurations.
- Prepared remediation recommendations using CVSS-based risk assessment.
- [Internship Certificate]

TECHNICAL SKILLS

Security Domains: Penetration Testing, Vulnerability Assessment, Web Application Security, Network Security, Threat Analysis, Incident Response

Security Tools: Burp Suite, Nmap, Wireshark, Metasploit, OWASP ZAP, Gobuster, SQLMap, Nessus/OpenVAS, Splunk, Wazuh, Kali Linux

Programming: Python, Bash Scripting

Security Concepts: OWASP Top 10, Network Traffic Analysis, Privilege Escalation, Windows Security, Linux Security, SIEM, Log Analysis

Development: Streamlit, Machine Learning, Random Forest

PROJECTS

Machine Learning Malware Detection for PE Executables **Jan 2026 – Apr 2026**
Major Project | [GitHub]

- Developed a malware detection system using Random Forest for PE executable classification.
- Built a feature extraction pipeline and deployed an interactive Streamlit application.
- Research paper accepted on machine learning-based malware detection.
- *Technologies:* Python, Random Forest, Streamlit, Pandas, Scikit-learn.

Vulnerability Assessment and Web Application Pentesting Labs **Jul 2024 – Oct 2024**

- Conducted reconnaissance, service enumeration, and vulnerability assessment.
- Identified SQL Injection, XSS, CSRF, and file inclusion vulnerabilities.
- *Tools:* Nmap, Gobuster, OWASP ZAP, Metasploit.

PROJECTS (CONTINUED)

CTF Security Research and Exploitation **2021 – Present**

Independent Security Research

- Solved 50+ HackTheBox and TryHackMe labs covering privilege escalation and system enumeration.
- Performed Windows enumeration, privilege escalation, and attack simulation exercises.

Personal Cybersecurity Home Lab **2021 – Present**

Self-driven Practical Project

- Built an isolated cybersecurity lab using Kali Linux and vulnerable environments.
- Performed vulnerability assessment, network traffic analysis, and attack simulation exercises.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering May 2026

Specialization: Cybersecurity

SRM Institute of Science and Technology, Kattankulathur, Chennai

[Provisional Certificate]

CERTIFICATIONS

- **CompTIA Security+ (SY0-601)** [Verify Credential] December 2022
- **eJPT (eLearnSecurity Junior Penetration Tester)** – INE Security [Verify Credential] July 2021
- **HackTheBox SRMIST – Events Organizer Certification** [View Certificate] April 2024
- **Certified TPRM Warrior** [View Certificate] March 2026
- **AWS Certified Cloud Practitioner** – In Progress

LEADERSHIP AND COMMUNITY

Member and Event Organizer, HackTheBox Club **Mar 2024 – Sep 2024**

SRM Institute of Science and Technology

- Organized cybersecurity workshops and Capture The Flag (CTF) competitions for 100+ students.
- Conducted sessions on reconnaissance, Nmap scanning, Burp Suite workflows, and privilege escalation concepts.
- Organized hands-on security labs and practical cybersecurity demonstrations.

Independent Cybersecurity Research **2021 – Present**

Community Learning Initiative

- Participated in cybersecurity labs, CTF challenges, and security research activities.
- Published technical write-ups and cybersecurity educational content covering exploitation methodologies and defensive concepts.
- Strengthened practical skills in penetration testing, vulnerability assessment, and system security.

ACHIEVEMENTS AND COMMUNITY

- Ranked in the **Top 9% globally on TryHackMe**, completing labs covering penetration testing, privilege escalation, web exploitation, and defensive security.
- Participated in CTF competitions and collaborative cybersecurity learning initiatives through **HackTheBox Club, SRMIST** (Mar 2024 – Sep 2024).
- Created cybersecurity educational content through **YouTube**, covering practical labs and security concepts.
- Published technical write-ups on **Medium**, documenting exploitation techniques and mitigation strategies.
- Shared cybersecurity research, lab write-ups, and technical insights through **LinkedIn**.
